

## ENCOMPASS MOBILE ASSET TRACKING SYSTEM

**Search Less. Care More.**

What is Encompass- **Search Less. Care More.** – a mobile medical equipment tracking system to provide real time equipment locations within the facility. This online platform provides clinical staff the ability to find and retrieve equipment quickly allowing more time for patient care.

### Encompass Applications – **Find It and Navigate It – Enter your 3-4 Login for access**

**NOTE:** For Navigate and FindIt you may use **Search** field to look by serial #, control #, description, model #.

Map-based real time asset locator. Use to view all tracked assets. Drill down to see recently tracked, low battery, open SRs and more.

Identify assets that may be near or have left the location.

Scan QR to Learn More

Look for a specific asset or asset type. See in a list by location or classification. Drill down to more specific details. Enable asset notification.
