## Antenatal Steroid Query Modifications

### Nursing Documentation

A new query "Antenatal steroid given" has been added. If the nurse selects "Yes", they can answer the next two queries.

If the nurse selects "No" for "Antenatal steroid given", the next two queries are skipped.

The query "Antenatal steroid time" has been removed.

This change impacts the following assessments:

- OB Prenatal Records
- All Neonate Admission Histories
- All Health Histories

Maternal herpes	<input checked="" type="checkbox"/> Currently negative <input type="checkbox"/> Currently positive
Maternal current active lesion	<input type="radio"/> Yes <input checked="" type="radio"/> No
Maternal date of last herpes outbreak	01/04/24
Antenatal steroid given	<input checked="" type="radio"/> Yes <input type="radio"/> No
Antenatal steroid number of doses	2
Antenatal steroid date of last dose	05/05/25

Maternal current active lesion	<input type="radio"/> Yes <input checked="" type="radio"/> No
Maternal date of last herpes outbreak	01/04/24
Antenatal steroid given	<input type="radio"/> Yes <input checked="" type="radio"/> No
Antenatal steroid number of doses	
Antenatal steroid date of last dose	

## Provider Documentation

The provider will now see the new query “Antenatal steroid given, Antenatal steroid number of doses” in addition to “Antenatal steroid date of last dose”. These will recall from nursing documentation.

The query “Antenatal steroid time” has been removed.

This change impacts the following notes:

- Neonatology Attend at Delivery
- Neonatology Consult Note
- Neonatology Discharge Summary
- Neonatology H&P
- Neonatology H&P w Discharge
- Neonatology Transfer Note
