# MEDITECH Expanse TIP SHEET
## Provider Consult Screen Enhancement
*SA Division, Wave 1A Capital, Wave 1B East Florida*

**HCA Healthcare®**

---

Certain Divisions and Facilities utilize a provider consult workflow in which consults can be designated by some combination of:

A. Specific provider
B. Provider group
C. On-call provider

Currently, these fields are not required. This creates the possibility that a user can enter a consult order without specifying the consultant type.

---

Based on Division feedback, the provider consult screen will be updated to now require ALL consultant options leveraged by the facility until one is designated.

This enhancement will apply to:
- SA Division
- Wave 1A Capital Sites
- Wave 1B EFL Sites

NFL and NH facilities will remain unchanged.

---

**Examples:**

1. **Consulting Provider answered** – requirement removed from Group & On-Call queries

2. **Provider Group answered** – requirement removed from Provider & On-Call queries

3. **On Call equals "Yes"** – requirement removed from Provider & Provider Group queries

The Consulting Provider query will still become required when the "Consulting provider notified" query equals "Yes."
