## **DIVISION SCOPE OF SERVICE**

**NOTE: Where education may not be defined in qualifications area of the Scope, HCA Healthcare requires the highest level of education completed (not training or courses) confirmed on your background check.**

### **State Requirements:**

- License required if practicing as any of the below vocations in state of practice:
  - Respiratory Therapy
  - EMT-Basic or Paramedic
  - LPN or LVN
  - RN
  - Physical Therapist
  - Physical Therapist Assistant

### **Experience:**

- N/A

### **Preferred Experience:**

- Previous Hyperbaric Tech experience

### **Competencies:**

The Hyperbaric Technologist (Certified) will demonstrate:

- Be able to carry out relevant diagnostic and clinical procedures such as:
  - Ability to report to nurse or physician an accurate medical history
  - Assess patient for pain and document findings
  - Obtain vital signs (pulse, respiratory rate, body temperature, and blood pressure)
  - Observing changes in neurological status
  - Know when to use appropriate clean or sterile techniques
  - Collection and removal of patient waste products
  - Assist in patient care procedures; dressing changes
  - Basic EKG recognition; set alarm parameters; print and post strip
  - Ability to safely operate all stretchers, gurneys, wheelchairs, beds and other assistive devices
  - Comply with quality control (QC) measures; glucometer
- Prepare patient for treatment
  - Body positioning of patients
  - All cotton garments or other approved materials only for in chamber
  - EKG placement on patient, as ordered
  - Age specific patient education on fundamentals of HBO treatment; equalizing ear pressure
  - Provide comfort measures with approved safety constraints.
- Maintain CPR, ability to establish an airway
- Describe the signs, symptoms and treatment of hyper- and hypothermia
- Describe the effects of gases on the body and their limits under pressure
- Describe the effects of pressure on the body and the principles of decompression and therapeutic procedures
- Proper body mechanics to protect self from injury
- Reinforce age-specific teaching
- Perform transcutaneous oximetry (TCOM), as ordered
- Basic medical terminology
- Proper use and application of restraints when ordered by physician; assess circulation
- Patient privacy and confidentiality; observe HIPAA requirements
- Maintain private and secure medical records.
- Language Ability
  - Ability to read and interpret documents such as safety rules, operating and maintenance instructions, and procedural manuals

## DIVISION SCOPE OF SERVICE

- Ability to speak effectively before groups of customers or employees of organization
- Effective communication and interpersonal skills
- Math Ability
  - Ability to add, subtract, multiple, and divide in all units of measurement, using whole numbers, common fractions, and decimals.
  - Ability to compute rate, ratio, and percent, and to draw and interpret bar graphs.
- Reasoning Ability
  - Ability to apply common sense understanding to carry out instructions furnished in written, oral, or diagram form.
  - Ability to deal with problems involving several concrete variables in standardized situations.
- Computer Skills
  - Proficient in Microsoft Office, Outlook and Word; able to navigate through internet and intranet.
- Work Environment
  - May be required to work around caustic chemicals 1% of the time and outdoor weather conditions 1% of the time
  - Ability to work around a moderate noise level, such as an office environment.
- Physical Demands
  - Stand approximately 25% of the time, walk 25% of the time, sit 50% of the time
  - Use touch or feel 95% of the time, reach 60% of the time, and stoop, kneel, or crouch 5% of the time.
  - Lifting/Moving items up to 75 pounds or more, with equipment assistance
  - Talk and/or hear 100% of the time.
- Accountability
  - Provides a high quality and safe standard for patient care.
  - Communicate with physician and staff
  - Provides courteous, efficient customer care and safe operations
- Safe environment for patients
  - Uses at least two ways to identify patients before procedure
  - Labels all medications and solutions in surgical field in procedural settings
  - Label containers used for blood and specimens in the presence of the patient
  - Participates in the pre-procedure process to verify the correct procedure, for the correct patient, at the correct site/side and involves the patient in the verification process when possible.
- Infection prevention
  - Consistent hand hygiene
  - Uses personal protective equipment (PPE)
  - Required immunizations per Division requirements
  - Complies with Isolation precautions
  - Maintains sterile field
- Other Competencies
  - Dependable, on time, customer service, adaptability, attention to detail, ability to follow through, multi-tasker, safety and security, technical/functional proficiency and knowledge, problem solving ability, sound judgment, and ability to relax patients
